

Canal Company Sediment Basin (Canyon CD)

Program	Water Quality Implementation		
Lead Implementer	Idaho Soil and Water Conservation Commission		
Funders	Canyon Conservation District, Idaho Soil and Water Conservation Commission		
Other Organizations	U.S. Natural Resources Conservation Service		
Project Primary Contact	Jon Beals (jon.beals@swc.idaho.gov)		
Project Stage	Deferred	Duration	2014
Estimated Total Cost	\$120,000.00	Secured Funding	\$2,000.00
No Funding Source Identified Yet	\$0.00	Targeted Funding	\$118,000.00

Natural Resource Projects & Practices ➤ Water Quality Implementation

This project consists of installing a sediment basin of about six acres. This basin will be along a major canal and will serve to clean up the water in the canal system to provide cleaner water to the downstream water users. Currently, the downstream users are experiencing problems with filters on drip systems due to the amount of sediment being transported in the canal. The origination of the sediment in the canal system is coming off fields upstream from the canal and is not from the acreage being irrigated by this canal. Total estimated cost is \$120,000.00. The State funding would be for 50% cost share.
